PROFESSIONAL SUMMARY

Geographer and GIS analyst with a B.A. in Geography (minor in Computer Science) and a Spatial Data Science Certificate, experienced in validating, cleaning, and analyzing spatial and attribute data in ESRI ArcGIS. Skilled in spatial queries, data quality assurance, and documenting findings and corrections, with Python, SQL, and Excel workflows that keep large, multi-source datasets accurate and consistent. Detail-oriented and organized, able to work independently, prioritize assignments, and meet project deadlines in technical team environments.

CORE COMPETENCIES

- Geospatial & Imagery Tools: ArcGIS Pro, ArcGIS Dashboards & StoryMaps, ArcPy, QGIS, Google Earth Pro, KML/KMZ, Web GIS (Leaflet/HTML/CSS).
- Programming & Data Analysis: Python, SQL, R, Pandas, NumPy, Jupyter Notebook, Microsoft Excel/Google Sheets.
- Design & Visualization Tools: ggplot2, Matplotlib, Canva, Adobe Illustrator, Adobe InDesign.
- Business Intelligence & Collaboration Tools: Power BI (DAX, Power Query), Microsoft 365 (Teams), Git/GitHub.
- Analytical Methods: Quantitative & qualitative research, spatial suitability and statistical analysis, data collection and management, geographic modeling.
- Communication & Collaboration: Cross-functional teamwork, technical report writing, conference-level presentation of research findings.
- Additional: ~2 years of self-directed study in cybersecurity fundamentals.

EDUCATION

B.A. in Geography, Minor in Computer Science *2021 – 2025*

CUNY Hunter College, New York, NY

Relevant coursework: Spatial Data Science; GIS Applications (Urban & Web GIS); GIS Analysis; Quantitative Methods in Geography; Geographic Research Methods; Data Visualization with R; Relational Databases & SQL Programming; Introduction to Computer Science; Elementary Probability & Statistics.

RESEARCH EXPERIENCE

NSF REU Research Intern | CUNY CREST *Jun 2024 – May 2025*

- Conducted original research, "Using Weather Stations to Analyze Climate Trends and Extreme Weather Events in Urban Environments," including operation, maintenance, and field deployment of weather-sensor networks.
- Performed spatial suitability analysis of NYC communities using ESRI ArcGIS to model and interpret geospatial and climatic data.
- Fused and analyzed multi-source datasets (including NASA POWER satellite/remote-sensing data) with statistical methods in R, Python, SQL, and Excel to identify climate trends across large, complex datasets.
- Built Python, R, and SQL workflows for efficient data management, visualization, and geographic data processing.
- Prepared and delivered research findings at national conferences: AGU (Washington, D.C., 2024), AMS (New Orleans, 2025), and the Online MAA Symposium (New York City, 2025).
- Collaborated daily with a multidisciplinary research team, communicating findings clearly under demanding deadlines — directly relevant to the round-the-clock, mission-partner-facing nature of GEOINT analysis work.

VOLUNTEER EXPERIENCE

Stewardship Volunteer | NYC Parks & Recreation *Apr 2025 – Jul 2025*

- Collected field data for NYC's 2025 Tree Census, supporting citywide urban-forestry records. Planted trees and shrubs and supported forest restoration at Pelham Bay, Bronx Park, and Alley Pond; collected field data for NYC's 2025 Tree Census.
